ABOUT

BGCT

BISWA GOURI
Charitable Trust
BECAUSE DIFFERENT IS BEAUTIFUL
BUBBLES • PRAGATI • OUTREACH

Founded in 2009 by Sarbani Mallick, BGCT embraces a lifecycle approach to care.

Vision: To work towards the empowerment and enhancement of individuals with autism and other intellectual challenges through vocational and life skills, creating valued social roles and a sense of self-worth.

Mission: To build an inclusive society founded on trust, respect, and equality, allowing individuals with autism and other intellectual challenges to live the life they choose. Our Values: Integrity, empathy, dignity, inclusion, and collaboration.

OUR PROGRAMS
AT A GLANCE

Bubbles Centre for Autism

School Program for under 15 years

Pragati Towards Livelihood

Vocational Training unit

Outreach Program

Rural outreach project to reach the unreached in rural parts of the country.

Bubbles Academy

Training unit for Parents and Professionals

Our Lifecycle Approach: A Continuum of Care

Empowerment is a lifelong journey. Our "lifecycle approach" ensures that as neurodiverse individuals grow, our support evolves with them. The journey often begins at the Bubbles Centre for Autism (ages 3-15) with early intervention, foundational education, and holistic therapies. As they mature, they transition to the Pragati Centre Towards Livelihood (ages 15+) to build vocational and life skills and eventually to Pathways to Livelihood, our supported workstation. However, we believe that a person's worth is not defined by a paycheck. Our true goal is to help neurodiverse individuals choose their own path. Whether that leads to independent employment, supported work, or finding other meaningful ways to participate in their community, this continuum of care ensures they are guided from their earliest developmental milestones to the profound dignity of living a life they choose.

A HOLISTIC APPROACH TO NEURODIVERSITY

NURTURING THE WHOLE INDIVIDUAL

- Counselling Sessions

We believe that true empowerment cannot happen in silos. Our services are designed holistically, meaning we don't just focus on a single aspect of development—we nurture the whole person cognitively, emotionally, socially, and economically.

Through our lifecycle approach, we surround our neurodiverse individuals and their families with an ecosystem of care that evolves alongside them

Our holistic approach is not about making neurodiverse individuals fit into a standard mold; it is about equipping them with the skills, confidence, and supportive environment they need to choose their path and thrive.

MESSAGE FROM Founder

BISWA GOURI Charitable Trust
BECAUSE DIFFERENT IS BEAUTIFUL
BUBBLES • PRAGATI • OUTREACH

Sarbani Mallick

FOUNDER - DIRECTOR

Dear Friends, Partners, and Well-Wishers,

As I sit down to write this reflection, I am filled with a profound sense of gratitude and an enduring belief that – different is, indeed, beautiful.

2025-26 was a year that tested our resolve and rewarded our faith. It was a year of building – building systems, building people, and building bridges to a world that is slowly, steadily, becoming more inclusive.

Milestones of Dignity

At Bubbles, we witnessed incredible breakthroughs in communication as children began expressing their needs and personalities with new confidence. At Pragati, our young adults stepped into corporate offices, held exhibitions, and presented their own stories. We are immensely proud that 11 trainees transitioned into external employment this year—a true testament to the power of structured vocational training and self-advocacy.

MESSAGE FROM Founder

BISWA GOURI Charitable Trust
BECAUSE DIFFERENT IS BEAUTIFUL
BUBBLES • PRAGATI • OUTREACH

Strength in Structure

This year reinforced a vital lesson: when systems are strong, people flourish. During periods of transition, our learners and trainees seamlessly adapted, breaking the myth that neurodiverse individuals cannot handle change. Because of the solid structures we built—visual schedules, consistent routines, and structured teaching—they continued to thrive.

Our Lifeline: The Community

None of this is possible without our village. We extend our deepest thanks to:

- Our Parents: For co-leading, trusting us, and showing up at every turn.
- Our Sponsors: Organizations like Azim Premji Foundation, ANZ, CISCO, Allegis, Bajaj Finserv, Rubrik, and many more, whose belief funds dignity.
- Our Leadership & Mentors: Our Board Members, including our newest addition, Tulip Sinha, and our academic consultant, Rita James, whose pedagogical wisdom has deeply shaped our learning frameworks.

Reaching the World

Our collective journey was recognized on broader stages this year, from panels at Workability Asia 2025 in Manila and TEDx Youth PSB, to receiving the Jan Utsav National Achievers Award. These recognitions belong to every learner who dared to communicate, every parent who persevered, and every staff member who showed up with love.

Looking Ahead to 2026-27

We are excited to scale our supported workstations, deepen our corporate partnerships, and expand our outreach. Together, we will continue building an ecosystem where neurodiverse individuals are not just included, but celebrated.
Thank you for walking this journey with us.

Warmly,
Sarbani Mallick
Founder Director, Biswa Gouri Charitable Trust

IMPACT HIGHLIGHTS 2025 - 2026

This section highlights the measurable impact of our lifecycle approach, translating our daily therapeutic and vocational efforts into concrete numbers.

Performance Highlights:

These achievements reflect the power of our shared community—proving what is possible when parents, educators, and partners work together to build inclusive pathways

PROGRAMME DEEP-DIVE

BUBBLES CENTRE FOR AUTISM

Objective

Holistic education and therapy for children (ages 3–15).

Programme Overview

Bubbles Centre for Autism is BGCT's school programme for children aged 3 to 15 years with Autism Spectrum Disorder and Intellectual Disabilities. It provides a high-intensity, multidisciplinary intervention model that integrates education, therapy, and family empowerment, removing economic and social barriers so that every child receives the support they deserve.

The programme follows an Open Basic Education (OBE) curriculum, with each child supported by an Individual Education Plan (IEP) tailored to their specific strengths and needs. We are grateful to Rita James, our Academic Consultant at Bubbles, for her invaluable contribution in sharing OBE curriculum books and pedagogical knowledge that have significantly strengthened our academic framework.

Key Outcomes 2025–26

- 100% of students have an active, individualised IEP
- 100% of students demonstrated improved communication ability by year end
- Students participated in inclusive events and outings
- Majority of parents attended at least one Open House session

Through these combined modalities, Bubbles lays a joyful and resilient foundation, preparing each child to confidently take their next steps toward independence.

PROGRAMME DEEP-DIVE

BUBBLES CENTRE FOR AUTISM

Impact on Stakeholders

For students, Bubbles provides a structured, predictable, and nurturing environment where diverse learners can develop at their own pace while being held to high expectations. Many non-speaking children have found their voice through AAC tools, anchoring school events and independently communicating their needs in community settings. Students from economically disadvantaged backgrounds receive the same quality of intervention as their peers, breaking the link between financial hardship and educational exclusion.

For families, particularly parents, Bubbles acts as a second home. Parents are transitioned from passive caregivers into active co-therapists through consistent training, open houses, and one-to-one support. Home-school continuity is strengthened through home visits and ongoing communication, ensuring that learning does not stop at the school gate.

For the wider community, Bubbles demonstrates what structured, inclusive education can achieve. Through collaborations with DPS Bangalore North for integrated sports, visits to local shops, and participation in mainstream festivals and events, our students prove daily that neurodiverse individuals belong in every corner of society.

> *"When you gave my autistic child this scholarship, you gave us so much more than financial help — you gave us hope. He is calmer now, more settled, and I see a peace in him that I prayed for every day."*
> **— Lavanya M., Mother of Rajath Gowda**

IMPACT STORIES

BUBBLES CENTRE FOR AUTISM

Charu's Story: Finding Her Voice

When Charu joined Bubbles, she was very quiet and compliant, rarely showing expression and following instructions without question. Through the year, with structured support and the Avaz application, she has made remarkable progress in communication and self-expression.

Charu now completes structured tasks independently and with enjoyment. She smiles more, initiates communication to request her needs, and is gradually expressing preferences and opinions. In one notable moment, when she was upset and crying, her teacher guided her through slow, supportive questions. Through Avaz, Charu expressed that her ear hurt and that she needed medicine. Once her need was addressed, she regulated immediately. This was not just communication — it was self-advocacy.

Perhaps most significantly, Charu's computer skills have enabled her to build a social connection with another girl through the Avaz app — her first technology-enabled friendship. Her mother has also been trained to use Avaz in her native language, strengthening the home-school connection.

IMPACT STORIES

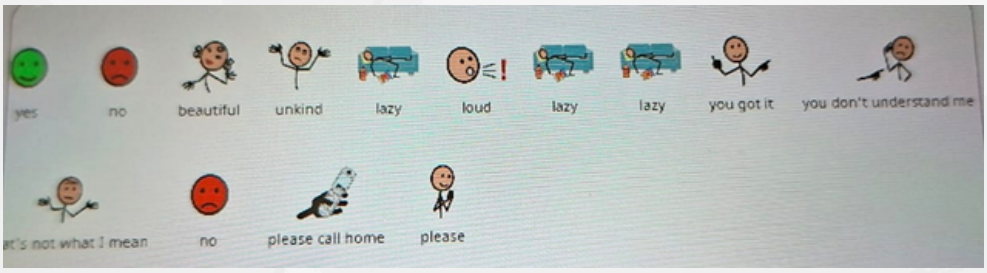

BUBBLES CENTRE FOR AUTISM

Mokshith's Moment: The Power of Expression

Mokshith, a 15-year-old student, was having difficulty with a classmate and appeared to be targeting her behaviour. In the past, this may have resulted in escalation or withdrawal. Instead, through guided questioning, he used Avaz to express how he felt. He described her as *"beautiful but unkind, lazy and loud."* When the teacher gently challenged his perception, Mokshith responded, *"you don't understand me"* and *"that's not what I mean."*

This moment was more than a classroom interaction—it was self-advocacy. It showed that Mokshith was not only able to express complex, nuanced emotions, but also to assert his perspective when misunderstood.

For a non-speaking teenager, this represents a profound shift—from behaviour as communication to communication as expression.

The Pre-Vocational Group: From Behaviour to Communication

Four non-speaking students aged 12-15, all from the scholarship programme, faced significant barriers to communication and independence. Crying, withdrawal, hitting, and refusal to engage were their primary means of communicating distress. Through a structured, individualised in-house curriculum focused on communication, emotional regulation, and pre-vocational skills, we began to see gradual but profound change.

These students now use Avaz to communicate needs, discomfort, and responses. They participate in community settings — visiting local shops, ordering food independently with their own money, and navigating real-world environments. They join integrated sports [illegible] regularly. Their world has expanded beyond the school campu[illegible] dignity.

PROGRAMME DEEP-DIVE

PRAGATI TOWARDS LIVELIHOOD

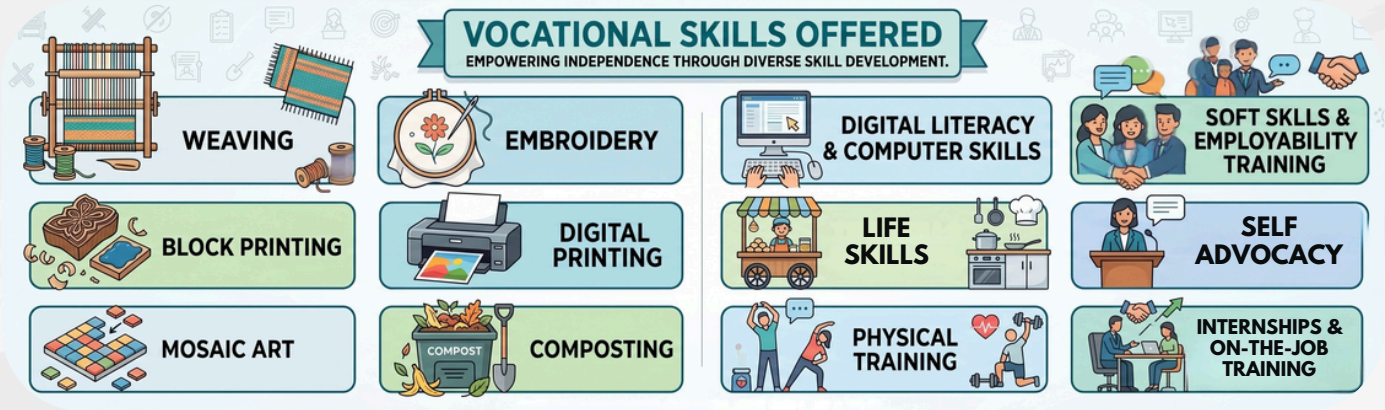

Objective

Vocational training and life skills for young adults (15+).

Programme Overview

Pragati Towards Livelihood is BGCT's vocational training centre for young adults aged 15 and above. Pragati's mission is to transform potential into purpose — equipping neurodiverse individuals not just for the workforce, but for a life of dignity, independence, and self-determination.

The programme offers a rich combination of craft-based vocational skills, digital competencies, life skills, self-advocacy, and real-world work exposure through internships and on-the-job training. Every activity at Pragati is designed not just to teach a skill, but to build the confidence, communication, and work-readiness that enable meaningful employment.

Impact on Stakeholders

For trainees, Pragati is a space where they are seen, valued, and challenged. The combination of hands-on craft work with digital skills and life skills training creates a holistic preparation for adulthood. Trainees experience the pride of creating products for sale, presenting themselves in corporate settings, and — for many — earning a stipend for the first time.

For families, particularly parents who worry deeply about their child's future after school, Pragati offers both hope and a roadmap. Parent empowerment sessions, open houses give families both practical tools and the solidarity of a community navigating the same journey.

For employers, Pragati acts as a bridge—equipping individuals who may have been overlooked by traditional hiring pathways with the skills, communication tools, and work habits that make them valuable team members. Through hands-on volunteer engagement sessions hosted directly with our community, corporate teams from CISCO, Allegis, and Wipro have had the opportunity to work alongside our trainees, fostering meaningful connections and gaining firsthand experience of neurodiversity in action.

PROGRAMME DEEP-DIVE

PRAGATI TOWARDS LIVELIHOOD

Our Pedagogy

Pragati is rooted in a Person-Centred Approach — development plans are designed keeping in mind the interests and inclinations of each young adult. We follow Structured Teaching Methodology to create predictable environments with visual cues and scaffolding. This approach makes the learning environment highly accessible for neurodivergent individuals, building confidence and competence in tandem.

The programme is structured as a tiered competency framework — beginning with foundational skills (sitting tolerance, transition readiness), progressing through communication and pre-vocational training, then domain-specific skill training and life skills, and culminating in employability training and real-world work placement. The ultimate goal is independent young adults with Socially Valued Roles.

Pragati at a Glance: Cumulative Impact

74 Total Trainees since 2023	**44** Currently in Skill Training	**16** In Employment or Internships (cumulative)	**19** In Workplace Engagements (2025-26)

Training Partners

Pragati's programme is enriched through partnerships with specialist organisations who bring complementary expertise in skill training and therapeutic approaches. Our training partners include Sol's ARC, Snehadhara Foundation (Continuum of Compassion and Care), and the National Institute of Mental Health & Neurosciences (NIMHANS). These collaborations deepen the quality and diversity of learning experiences offered to our trainees.

Design Innovation: Collaboration with NID

Between December 2024 and early 2025, students from the National Institute of Design (NID) completed a study on Economic Sustainability at Pragati. Their research focused on evaluating trainee skill profiles, production processes and costing, and market viability of our products and services. Based on their observations and recommendations, Pragati has introduced meaningful innovations in its product range — including the use of original drawings from trainees as design elements and new expressive art curriculum elements such as Pixel Art and Paper Folding.

A product audit conducted through this process categorised our entire product range into three groups: products generating a profit, those requiring strategic intervention to become viable, and those at extreme loss where production has been reviewed. This data-driven approach to our social enterprise is helping Pragati become more economically sustainable while maintaining its core mission of skills development. One NID student who participated in the study is now continuing with Pragati as an Intern, deepening the collaboration further. He has now completed his internship but is invested in his commitment to our community

PROGRAMME DEEP-DIVE

PRAGATI TOWARDS LIVELIHOOD

New Product Innovations

This year saw an exciting expansion in our product portfolio. New creations include handwoven bookmarks, embroidered table runners and cushion covers with original motifs, fabric dolls and soft toys, woven coasters, board games, block-printed aprons, and a 2025 calendar featuring drawings by our trainees. In digital printing, we expanded our sublimation range to include custom-designed water bottles, mugs, planters, key chains, and LED flasks. The Horticulture unit also progressed, with trainees engaged in soil preparation, germination, composting, and propagation — skills with direct livelihood relevance.

The 7 Star Journey: A Model for Inclusive Employment

The placement of trainees at 7 Star Home Decor is one of Pragati's most defining achievements this year — and a replicable model for inclusive employment. The journey began with outsourced work brought to Pragati's premises. A group of 11 trainees then embarked on a 6-month internship at 7 Star, during which Pragati placed a full-time support resource on-site for the first three months, while Sarbani Mallick and Mubin also visited regularly to provide guidance.

After three months, Pragati gradually weaned off its intensive on-site support. With parents now empowered through the programme, they were able to step in as the primary support for the interns. On Dussehra, 8 of these young adults became full-time employees of 7 Star Home Decor — earning regular salaries and contributing meaningfully to a mainstream workplace. This model of transition — from training centre to outsourced work to internship to employment — is now a blueprint Pragati is seeking to replicate with other employers.

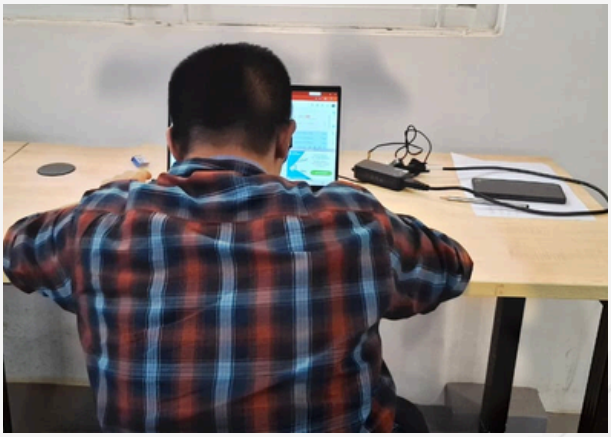

PROGRAMME DEEP-DIVE

PRAGATI TOWARDS LIVELIHOOD

Outsourced Work & Digital Livelihood

Trainees with strong digital skills have been engaged in real outsourced work with paying clients. At Eashwars, our digital interns work on Trademark Search Reports for the IP team. With Saksham Trust, trainees serve as proofreaders for outsourced documents. These are not simulated tasks — they are real professional responsibilities, with real accountability. This dimension of Pragati's work validates the employability of neurodiverse individuals in knowledge-economy roles and creates a direct pathway to mainstream employment.

International Collaboration: Zen Colo, Japan

The Zen Colo team from Japan visited Pragati this year to explore collaboration on upcycled product development. This exchange is building the foundation for a design and production partnership that will bring international perspectives to our creative arts curriculum while opening potential new markets for our trainees' work. The next steps of this collaboration are already underway, with a focus on designing and developing upcycled products together.

IMPACT STORIES

Darshan, a young autistic adult, is among Pragati's most visible success stories. Verbal and collaborative, Darshan excels in Mosaic Art, Digital tools, and Hand Blocking. His skill profile — developed through NID's Person-Centred assessment — reveals strong hand-eye coordination and leadership in group tasks.

After completing his training at Pragati, Darshan now works at Seven Star Decor Mall, contributing his skills in a real-world professional setting. Meanwhile, Ayaz, with an Intellectual Disability, has thrived in Digital Printing and big-motor activities. Patient, curious, and highly responsive to music, Ayaz too completed his training and has joined Seven Star Decor Mall, where he continues to build on his productive skills. Both Darshan and Ayaz represent the diversity of ability and aspiration that Pragati serves — and the power of believing in every individual.

PROGRAMME DEEP-DIVE

PATHWAYS TO LIVELIHOOD

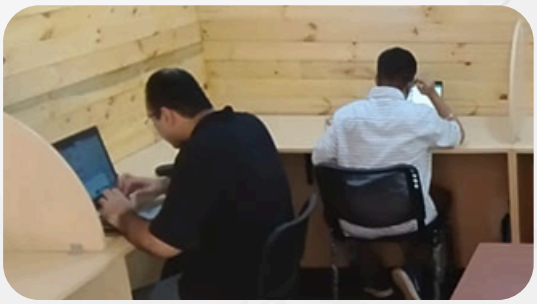

Objective

Real-world work experience with a stipend.

Real-World Work. Real Dignity.

Pathways to Livelihood is BGCT's supported workstation, offering trainees who have completed Pragati's vocational programme the opportunity to gain real-world work experience with a stipend. Tasks include proofreading, trademark search, product-making for commercial orders, and supported internships in the community.

The programme bridges the gap between structured vocational training and independent employment, providing a scaffolded environment where trainees can demonstrate their capabilities to potential employers while continuing to receive support.

2025–26 Milestones

- 12 young adults in open employment (including 8 full-time employees at 7 Star Home Decor)
- 1 trainee on ongoing internship at Thomson Reuters
- 6 trainees engaged at the Pragati Workstation (outsourced digital work and product orders)
- SPLEND formalised as a parent-led Section 8 company through an MOU with BGCT (October 2025)
- SPLEND workspace secured adjacent to Pragati, enabling a seamless education-to-work transition pathway
- Outsourced digital work partnerships established with Eashwars (IP/Trademark search) and Saksham Trust (proofreading)
- Corporate partnerships with CISCO, Allegis, and Wipro created inclusive hiring conversations

PROGRAMME DEEP-DIVE

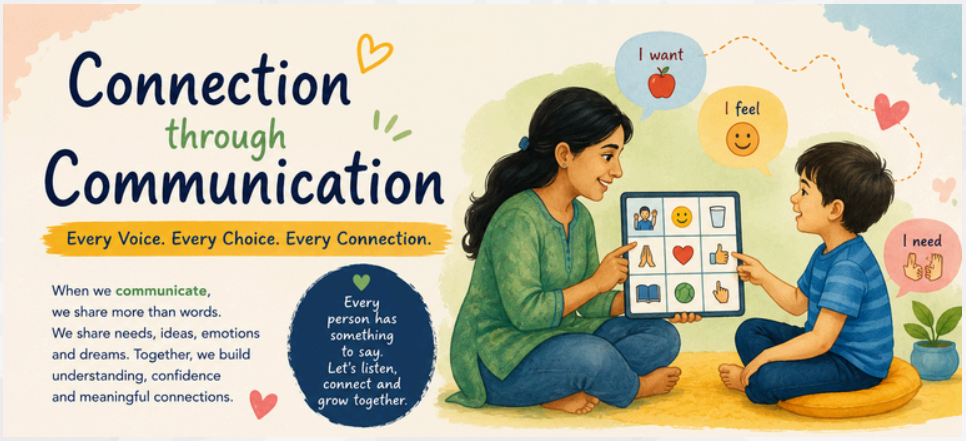

BUBBLES ACADEMY

Objective

Build capacity of parents and professionals outside BGCT

Launched in 2024, Bubbles Academy is a dedicated program designed to extend support far beyond our immediate community, reaching parents, caregivers, educators, therapists, corporates, and the general public interested in learning more about autism and developmental disabilities. The core philosophy of the academy is that knowledge is power, and this knowledge equips us to create meaningful change. Through a combination of awareness, education, and collaboration, the academy's mission is to inspire and support the creation of spaces where neurodivergent individuals can truly thrive.

Connection through Communication

The academy successfully launched its first online program, titled "Connection through Communication". Led by educators Meenakshy and Smita, this inaugural session was highly interactive and focused on making learning accessible to all. The curriculum emphasized acknowledging and celebrating every form of expression, exploring the diverse ways individuals communicate through gestures, visual cues, and assistive technology.

A central component of this program was providing hands-on, practical training in AVAZ, a powerful Augmentative and Alternative Communication (AAC) tool that supports children with communication challenges.

PROGRAMME DEEP-DIVE

BGCT OUTREACH

Objective

Sharing our best practices with others

Outreach Programmes & Collaborative Growth

Our Outreach Programme is dedicated to taking structured teaching methods, digital literacy tools, and inclusion best practices to rural communities and NGOs serving underserved neurodiverse populations. This year, we successfully hosted sensitisation and training workshops for 13 NGOs and institutions, expanding the reach of BGCT's expertise far beyond Bangalore.

Challenges in Sustained Outreach

One of the key learnings within our outreach efforts this year was the difficulty of retaining participants for Phase 2 of our training programmes. While initial interest and attendance from external communities are strong, sustaining engagement beyond introductory sessions remains a challenge. The professionals face competing demands on their time, and following through on applying learnings at their remote settings requires ongoing support. We are actively working to address this through improved programme structures, peer support networks, and accessible digital follow-up resources.

Digital Literacy Outreach & Exposure Visits

As part of these dedicated Outreach initiatives, we hosted an impactful Digital Literacy exposure visit in February 2026. Teams from the Future Foundation (Bengaluru), Saadhya Trust (Hospet), and Ashirwad (Ludhiana) visited our Bubbles Centre for an immersive two-day experience. They observed our Digital Literacy programme firsthand, taking adaptive technology strategies and best practices back to their own communities to ensure children in remote areas have access to the same quality of digital support.

With Gratitude to ANZ

We are deeply grateful to ANZ for their ongoing support of our Digital Literacy Unit. Their specific contribution towards travel expenses made these vital knowledge-sharing and exposure visits possible, ensuring that our technology-enabled learning models remain accessible and scalable for partner organisations.

TRANSITIONS
MILESTONES OF GROWTH

At BGCT, growth is a lifelong journey. Guided by our life-cycle approach and the philosophy of presuming competence, we prepare every child and young adult for the next stage of life. Every transition is intentional, ensuring learners continue to build confidence, independence, and meaningful life skills.

From Bubbles to Pragati

When students are ready, they transition from Bubbles into Pragati's vocational programme through a carefully planned process involving family counselling, familiarisation visits, and close collaboration between both teams.

This year, Isaac reached this milestone. Having joined Bubbles as a minimally speaking child, he steadily developed communication, self-help, digital, and pre-vocational skills through structured support. Today, he has confidently stepped into Pragati, becoming more independent and communicating effectively in both Telugu and English.

> "Graduation day was a deeply emotional and unforgettable moment for us. We are truly grateful for the care, patience, and support shown by all the teachers."
> — Isaac's Parents

From Pragati to Employment

Our commitment extends beyond vocational training. This year, 11 trainees transitioned from Pragati into employment, taking an important step towards greater independence, financial inclusion, and meaningful participation in the community.

Every milestone reflects our belief that, with the right support, every individual can continue to learn, grow, and move confidently towards the next stage of life.

PARENT EMPOWERMENT

Support Groups - *Meeting the Counsellor*
Total - 2

A Circle of Shared Strength

True empowerment pairs practical workshops with deep connection. Our skill-building workshops and regular Open Houses are vital to this process, providing parents with the practical strategies and transparent communication they need to confidently support their child's growth at home.

In our support networks, families share both daily challenges and hard-won solutions. It's a beautiful, reciprocal ecosystem: veteran parents guide newcomers, while new families remind the veterans of the massive bridges they've already crossed. Through this shared vulnerability, parents find solidarity and laughter—ensuring they don't just advocate for their children, but also celebrate their incredible community.

PARENT EMPOWERMENT

Formation of SPLEND

SPLEND: Building Legacies of Livelihood

What happens when parents unite to answer the daunting question of "What comes next?"

SPLEND is a testament to the power of parent-led advocacy. Dedicated to securing dignified livelihoods for neurodiverse adults, this initiative ensures our individuals thrive as active members of society. BGCT is incredibly proud to stand by SPLEND, formalizing our bond through an MOU this October to provide dedicated technical support. In a promising first step, SPLEND has already secured a workspace right next door to our training centre, ensuring a seamless connection between education and real-world work. It is a beautiful testament to what happens when a community joins hands—transforming shared worries into a legacy of action independence, and true inclusion.

STAFF
CAPACITY BUILDING

Trainings and Workshops

Smart Board Training for the Trainers

POSH Workshop

Mosaic Workshop

IAF Workshop

Expressive Art Workshop

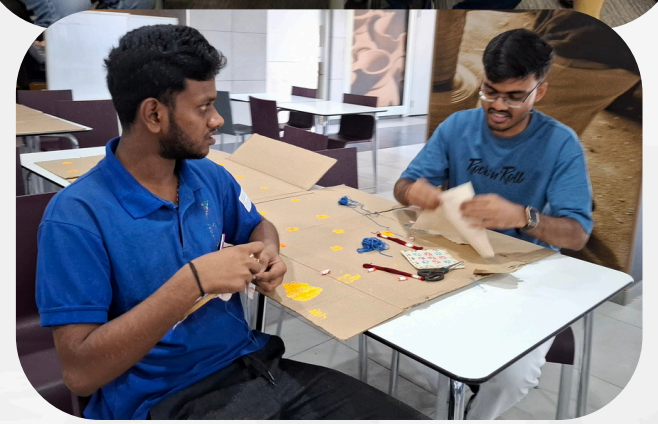

Nurturing a Culture of Care and Creativity

"Who dares to teach must never cease to learn." This principle drives our commitment to staff capacity building. This year, our educators expanded their toolkits through diverse workshops—from upcycling, mosaic, and expressive arts to hands-on bleach design with NID and specialized IAF facilitation training. By deepening pedagogical empathy and mastering new creative methodologies, our trainers are empowered to be intuitive guides. When we invest in those who guide, they pass that confidence directly to our students, transforming fabric, imagination, and learning into endless possibilities.

CORPORATE
VOLUNTEER ENGAGEMENTS

Buddy Project

CISCO

Allegis

WIPRO

Crafting Connections

This year, our vocational training beautifully intersected with corporate inclusion through our interactive "Buddy Project." During collaborative visits with corporate partners like CISCO, Allegis, Wipro, our Pragati trainees and corporate volunteers worked side-by-side to hand-embroider delicate coasters and bookmarks. Sharing the meticulous tasks of threading needles and mapping patterns, these sessions fostered genuine connections and shared learning. Every unique, handcrafted piece now stands as a tangible symbol of teamwork, proving that true inclusion grows through meaningful, hands-on interaction.

GLOBAL AUTISM CONVENTION

From January 21st to 25th, our team proudly participated in the Global Autism Convention (GAC) 3.0 at St. John's Medical College and Hospital in Bangalore. This event was a remarkable opportunity to showcase BGCT's multifaceted approach to inclusion, highlighting both our educational frameworks and our vocational enterprise.

Advocacy and Shared Learnings

Adding to our strong presence at the event, our Founder Director, Ms. Sarbani Mallick, served as the chair of a symposium, guiding critical conversations on neurodiversity. Alongside her, our educators—the true implementers on the ground—presented insightful posters highlighting our parent empowerment program and the specific modules of our digital literacy project. By sharing these strategies, we aim to strengthen partnerships beyond the classroom and help bridge the gap between daily classroom practice and larger societal policy for a more inclusive world. We remain deeply grateful to ANZ for their ongoing support of our digital literacy unit, which empowers us to make technology highly accessible for learning and communication.

Inclusion in Action: The Pragati GAC Order

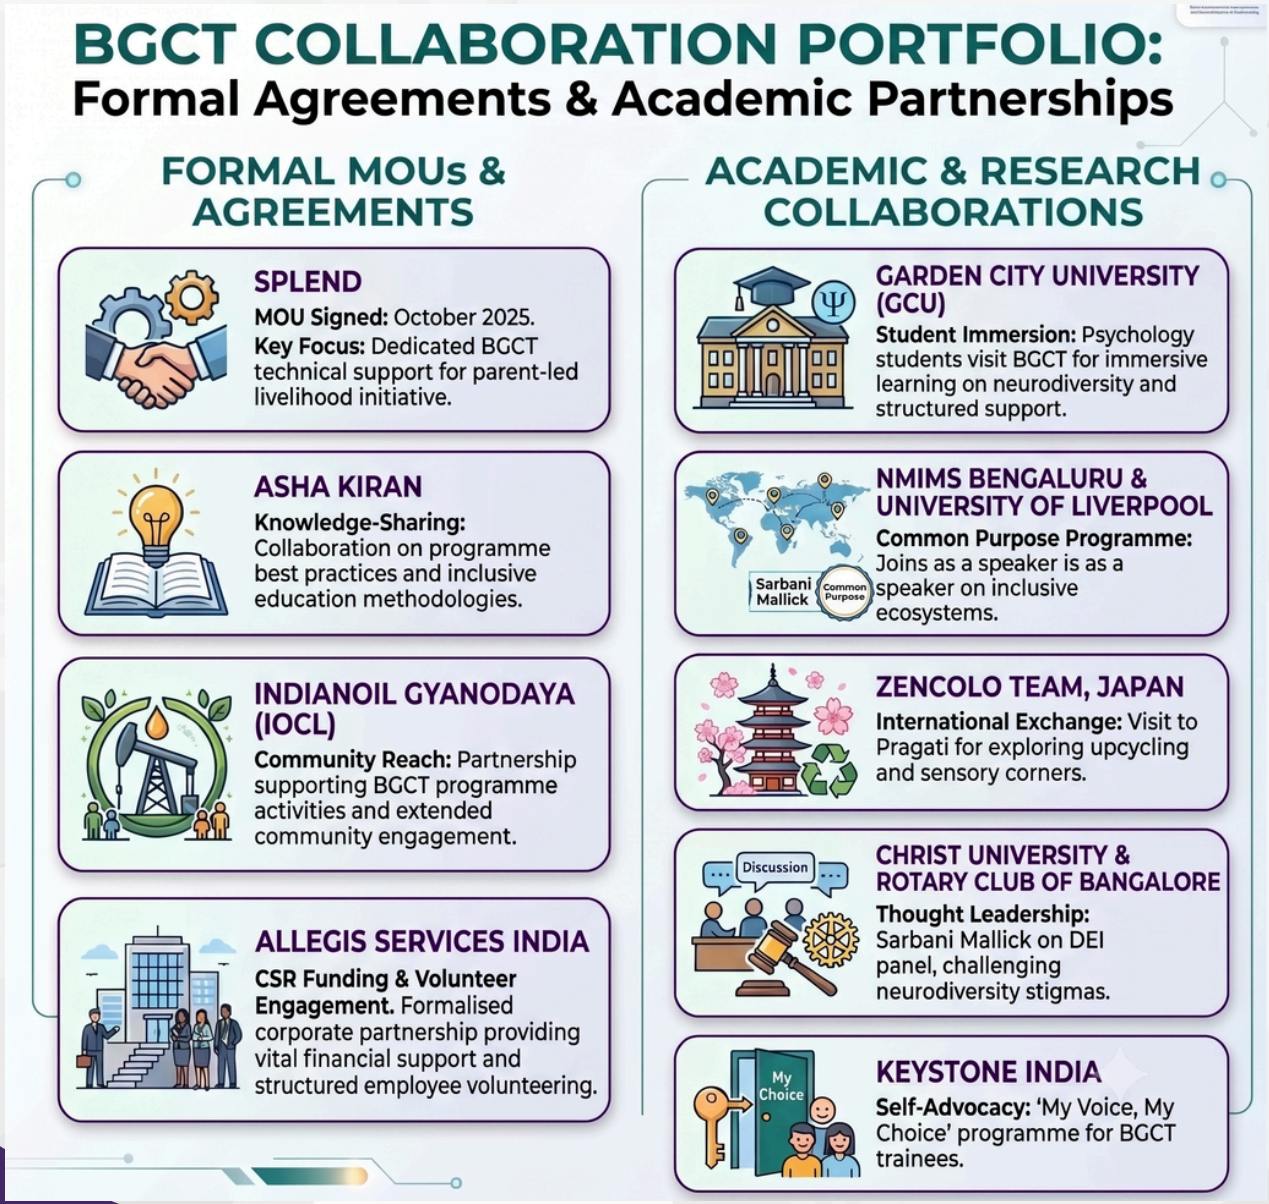

The convention also marked a massive, tangible milestone for our vocational trainees. We were incredibly excited to receive a special order from GAC for custom keychains and laptop bags. Fulfilling this order was a beautiful process of focus, fun, and teamwork, with our trainees working step-by-step to ensure every single piece was crafted with care and precision. Real-world orders like these do more than just showcase our vocational skills; they validate the hard work and capabilities of our adults in a professional market. We extend a heartfelt thank you to the Global Autism Convention for believing in our community and choosing inclusion in action!

COLLABORATIONS

WITH OTHER INSTITUTIONS

Partnering for a Shared Future

True inclusion extends far beyond the walls of our classrooms; it is a lived practice strengthened through shared experiences with the wider community. By actively partnering with academic institutions, corporate ecosystems, and grassroots organizations, we create vital, two-way bridges of learning. For our neurodiverse individuals, these collaborations offer invaluable real-world exposure—whether it is practicing self-advocacy, enjoying inclusive sports in mainstream environments, or experiencing professional workspaces firsthand to bridge the gap between education and employment.

COLLABORATIONS

WITH OTHER INSTITUTIONS

Zencolo Team (Japan) at Pragati

Teams from the Future Foundation (Bengaluru), Saadhya Trust (Hospet), and Ashirwad (Ludhiana) at Bubbles for Digital Literacy Outreach Program

Garden City University at BGCT to understand Autism

Motorola team at Pragati for Buddy Program

The Competence Programme

BGCT participated in the Common Purpose Programme at NMIMS Bengaluru in collaboration with the University of Liverpool, which brought together students from diverse academic and cultural backgrounds for a transformative three-day experience.

These interactions demystify neurodiversity for our partners, transforming academic theory into lived empathy and showcasing the immense, untapped potential of an inclusive workforce. We believe that when we learn, work, and play together, the impact ripples outward to shape a more accepting society. We warmly invite schools, universities, corporate teams, and community organizations to join hands with us on this journey. To explore meaningful volunteer engagements, inclusive hiring pathways, or collaborative initiatives, please reach out to us at **pragati@biswagouri.org or call 9008017868** and help us build a future where inclusion is simply business as usual.

SKILLS &

LEARNING WORKSHOPS

Composting Initiative: Objective: Hands-on sustainability

Bleach Design Workshop (NID): Objective: Trainer upskilling in expressive techniques.

Wreath-Making & Cupcake Decoration: Objective: Mentorship and life skills. Outcome: Alumni from Seven Star Decor Mall returned as mentors to teach

Mrs. Smita Patil led a cupcake frosting workshop Objective: Hands-on culinary skill-building and creative focus.

From Sustainable Practices to Practical Life Skills

Transforming everyday activities into powerful opportunities for growth, our focus on experiential learning blossomed through hands-on initiatives that nurtured independence, sustainability, and creativity. Trainees deepened their connection with the environment through an active composting initiative, learning to turn organic waste into rich soil and engaging directly with nature's cycle. Practical life skills were brilliantly brought to life as individuals took full ownership of running a vibrant pani puri stall, masterfully handling everything from ingredient preparation to real-world financial transactions. We also celebrated the reciprocal nature of our community through inspiring mentorship sessions; returning alumni stepped into leadership roles to teach the intricate art of wreath-making, while parent-led workshops brought joy and focus through cupcake decoration. To ensure these student milestones are always supported by dynamic teaching methods, our educators simultaneously expanded their toolkits. Through an immersive bleach design workshop led by NID, our trainers mastered expressive techniques, ensuring they are always equipped to help learners channel their creativity.

Pani Puri Stall: Objective: Life skills application.

OUTINGS &

COMMUNITY EXPERIENCES

Jinke Marri Adventurra: Sensory discovery for Bubbles tiny tots in a controlled environment.

Uttari Trek (with India Hikes): Pragati trainees combined trekking with a cleanliness drive.

Both Inclusive Sports Events

The Power of Experiential Journeys

Stepping beyond the familiar walls of our centres opens up a vibrant world of discovery, physical endurance, and joyful community connection. This year, our experiential learning approach took both Bubbles students and Pragati trainees on shared journeys of growth. Together, they safely pushed their boundaries and built profound peer bonds by conquering rugged trekking trails alongside dedicated community volunteers and experiencing the true independence of overnight wilderness camps. Tailored experiences further enriched these adventures—our younger learners engaged in gentle, sensory-friendly nature exploration, while our older Pragati trainees enjoyed the magic and community connection of an accessible, inclusive cinema experience. Whether navigating a challenging path, spending a night under the stars, or proudly showcasing their teamwork on the inclusive sports field, these outings proved that resilience and confidence flourish when we step out and explore the world together.

ADVOCACY & REPRESENTATION

Self Advocacy poster presentation by trainees at corporates

Objective: Professional empowerment and corporate awareness.

Outcome: Trainees confidently shared their strengths and needs directly with corporate teams, breaking down workplace stigmas and championing inclusive hiring.

Breaking Barriers Through Advocacy and Shared Experiences

This year, the spirit of advocacy and community integration resonated powerfully across all our initiatives. It began at the foundational level, where a collective, parent-led petition successfully secured a newly asphalted road to our centre—proving that when a community unites, they can literally pave the way for safe and accessible spaces. This momentum was carried forward by our students and trainees, who took to the public square with the "Avaz Do" street play to champion alternative communication (AAC) tools, and confidently stepped into corporate environments to present their own self-advocacy posters. Beyond advocacy, true inclusion flourished through shared community experiences. Whether it was bonding with peers over interactive puzzles at a mainstream math festival or building profound empathy by navigating unfamiliar paths through sound and touch in a collaborative "Dialogue in the Dark" exercise, our individuals proved that every interaction is an opportunity to break down barriers and build lasting connections.

ADVOCACY & REPRESENTATION

Collaborative Learning with Keystone

Five passionate self-advocates represented BGCT at Keystone India's two-day "My Voice, My Choice" program. Focused on assertive communication, boundary-setting, and leadership, the event empowered participants to strengthen their voices. Crucially, the gathering also served as a major step toward independent living, with our self-advocates experiencing the autonomy and confidence of a hotel stay away from home.

Avaz Do Street Play

On April 5, 2025, the BGCT team performed "Avaz Do" at the street play competition hosted by Mitra for Life — advocating for AAC (Augmentative and Alternative Communication) tools and the right to communication for all neurodiverse individuals. This was not just a performance — it was a call to action.

Road Repair Advocacy

A collective petition led by BGCT parents successfully resulted in the asphalting of the road leading to the Bubbles Centre — proving that when a community unites, it can literally pave the way for safer, more accessible spaces.

ADVOCACY & REPRESENTATION

Global Autism Convention 3.0
A collective petition led by BGCT parents successfully resulted in the asphalting of the road leading to the Bubbles Centre — proving that when a community unites, it can literally pave the way for safer, more accessible spaces.

Dialogue in the Dark (with DPS North):
Students experienced what it feels like to navigate the world without sight, relying solely on sound, touch, and guidance from others. As they moved through unfamiliar spaces, they developed a deeper appreciation for the importance of trust, communication, and teamwork. It transformed touch, sound, and human connection into powerful tools for understanding and inclusion.

ARITHMOS Math Fest (Vidyaniketan Academy):
Trainees actively participated alongside the wider student community through interactive math exhibits, hands-on activities, and engaging puzzles. The event encouraged collaboration, problem-solving, and communication in an inclusive environment where learning was enjoyable for everyone. It also provided trainees with an opportunity to build confidence, showcase their abilities, interact with peers, and experience meaningful social inclusion beyond the classroom.

Culture, Connection, and Care

Cultural celebrations are the heartbeat of a community, yet the traditional noise, crowds, and unpredictability of festivals can often be deeply overwhelming for neurodiverse individuals. To ensure our students and trainees never miss out on this magic, we mindfully reimagine these traditions into joyful, sensory-safe experiences. By using gentle preparatory tools like Social Stories, our educators help learners anticipate and understand upcoming festivities, entirely removing the anxiety of the unknown. The celebrations themselves are grounded in calming, hands-on engagement—whether it is the tactile joy of crafting clay, the visual focus of arranging vibrant flower patterns, or the quiet beauty of sensory play with light and petals. These festive moments also serve as beautiful bridges to the wider community, fostering intergenerational bonds through shared music sessions and heartfelt visits to eldercare homes. By structuring these traditions with deep empathy and care, we provide our individuals the profound opportunity to experience the warmth, belonging, and cultural richness of the season, completely free from sensory overload.

RECOGNITIONS & AWARDS

Championing inclusion on a global stage: Founder Sarbani Mallick joins changemakers at Workability Asia 2025 to advocate for meaningful livelihoods for persons with disabilities.

Founder Director Ms. Sarbani Mallick proudly receives the Jan Utsav National Achievers Award 2025 for "Outstanding Community Contribution," celebrating her relentless dedication to the neurodiversity movement.

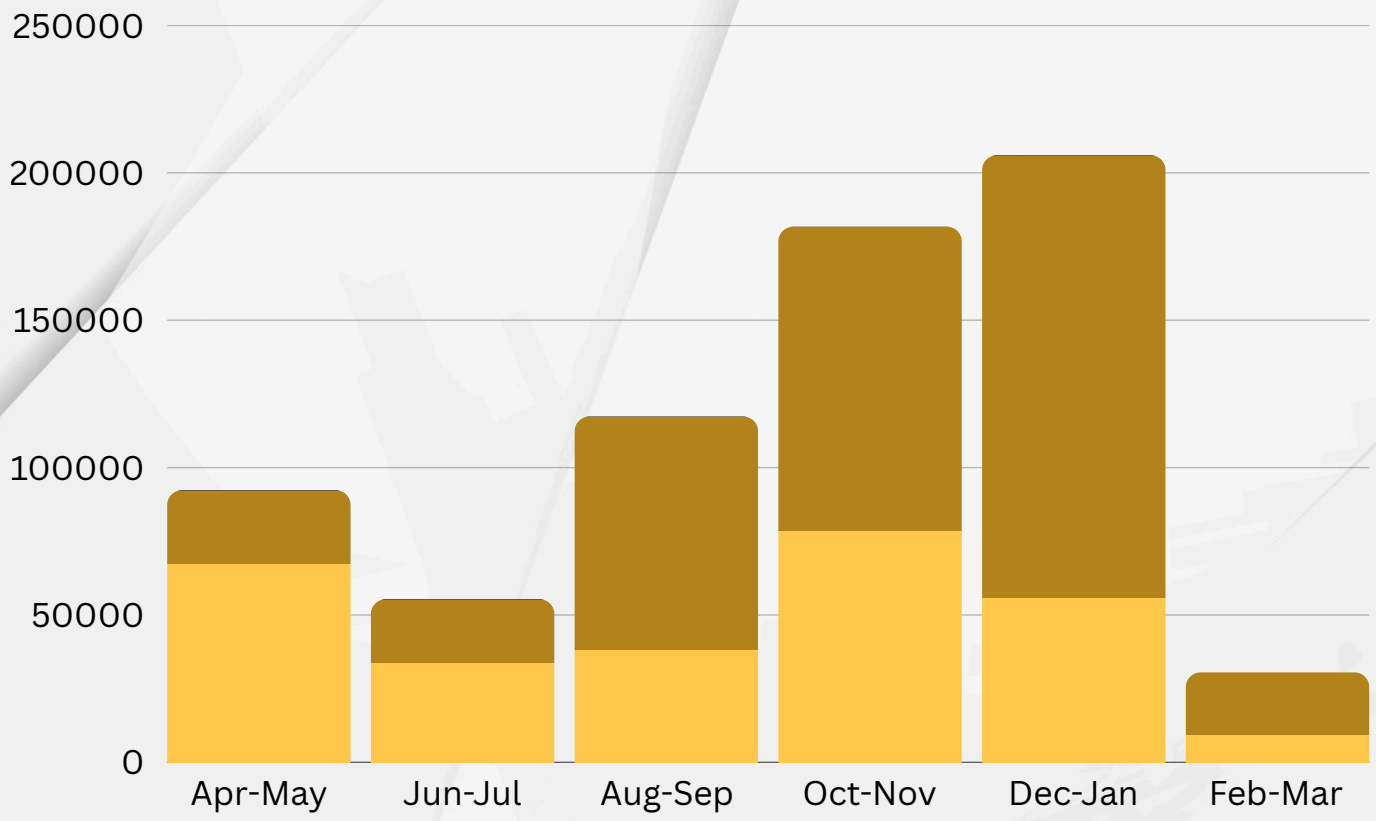

From a small garage to transforming countless lives, Founder Sarbani Mallick takes the TEDx stage to share "Triumph Redefined" and champion the neurodiversity movement.

Leading with Purpose

Advocacy is most powerful when it reaches new audiences, and this year, our Founder Director, Ms. Sarbani Mallick, took the mission of inclusive growth to broader platforms than ever before. Her impactful TEDx talk captured the very essence of our work, redefining triumph not by traditional medals, but by the dignity of giving every unseen individual the chance to run their own race. This lifelong commitment to the community was celebrated nationally on January 31st, when she received the "Jan Utsav National Achievers Award 2025" for Outstanding Community Contribution, recognized by the YES Trust and the Bharatiya Book of Records. The dialogue extended internationally at Workability Asia 2025 in Manila, where Ms. Mallick proudly represented BGCT as a panelist. Engaging with leaders across Asia, she helped shape vibrant discussions on inclusive employment. Together, these moments stand as a powerful testament to our growing movement, proving that when we champion inclusion, the world listens.

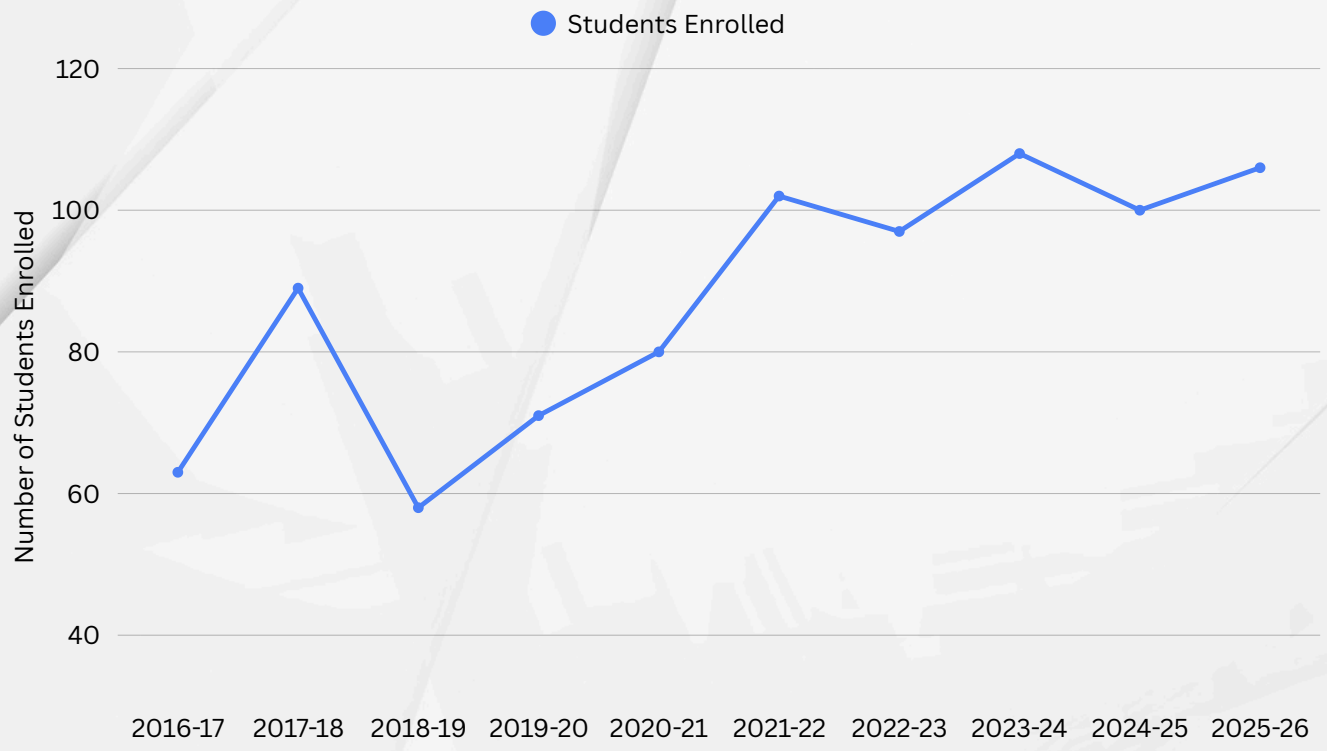

MARKET VALIDATION

A YEAR OF MEANINGFUL ENTERPRISE

This year, the exceptional craftsmanship of our Pragati trainees translated into remarkable real-world success, achieving an inspiring total annual sales figure of ₹6,83,020. This graph illustrates our dynamic sales journey across various avenues, including vibrant community exhibitions, pop-up stalls, bulk corporate gifting, and bespoke wedding and personal orders. The steady rise in sales, culminating in massive peaks during the festive and holiday seasons (October to January), reflects a growing market appreciation for our trainees' handcrafted products. Every single purchase represented on this chart is a direct investment in the dignity, skill-building, and financial independence of our neurodiverse adults.

10 YEAR DATA FOR BGCT

Over the past decade, the combined enrollment at Bubbles and Pragati has followed an inspiring journey of growth. From our earlier years to the present, we have seen our community expand significantly. Though the global COVID-19 pandemic understandably caused a temporary disruption and dip in admissions as families navigated uncertain times, we quickly adapted and bounced back stronger. Today, we proudly maintain a robust enrollment of over 100 students and trainees. This steady post-pandemic climb highlights our expanding capacity, the dedication of our educators, and the continued faith of our parent community.

CHALLENGES & LEARNINGS

GROWING THROUGH DIFFICULTY

Every year of growth brings its share of challenges. We believe in naming these honestly, because addressing them transparently is how we improve and how we build trust with our community.

BGCT navigated several challenges this year, including temporary staffing gaps, funding constraints, supporting the transition of Pragati trainees into inclusive employment, and sustaining long-term engagement in Bubbles Academy programmes. These experiences reinforced the strength of our structured systems and highlighted the need for stronger onboarding processes, diversified funding, deeper corporate partnerships, enhanced transition support, and more engaging, sustained learning models. Together, these learnings continue to shape a more resilient, sustainable, and impact-driven organisation.

LOOKING AHEAD

EXPANDING INCLUSIVE OPPORTUNITIES & COMMUNITY REACH

We will strengthen pathways to independence by expanding supported work opportunities for Pragati graduates through new corporate partnerships, inclusive hiring, internships, and product procurement. Simultaneously, we will deepen our outreach through Bubbles Academy and the Outreach Programme, extending BGCT's expertise to rural and underserved communities and increasing access to quality support.

2026–27

STRENGTHENING SUSTAINABILITY, RESEARCH & IMPACT

We will build a more sustainable future by diversifying our funding through institutional grants, long-term CSR partnerships, earned income, and professional training programmes. Alongside this, we will strengthen documentation and research to measure outcomes, demonstrate impact, and contribute to evidence-based practices in supporting neurodiverse individuals and their families.

REVIEW IN YEAR

Bubbles has truly become Aarush's second home. The care, patience and dedication of the faculty have made a remarkable difference in his journey. The peer interactions, outings and parent meetups have helped him grow in confidence, communication and social skills. Seeing Aarush happy, engaged and progressing every day fills us with gratitude. We sincerely thank the entire Bubbles team for creating such a nurturing environment.
Ananya, A

We are so grateful for Jaswanth's progress this year. The team's patience in teaching him the Avaz app has finally given him a voice, which means the world to us.
From block printing to daily exercise, we see him getting stronger, calmer, and more proud of his work every day. The focus on self-help skills is truly giving him the tools he needs to be independent. We feel so fortunate to be part of this family.
Anuradha

Before Pragati, my son Tarun faced many challenges with his speech and emotions. Three years later, the transformation is incredible. The team supported him like family, helping him build confidence and a positive mindset.
Now, thanks to the placement team, Tarun has a job at Seven Star where he feels comfortable and independent. I am forever grateful to Sarbani Ma'am, Shweta Ma'am, and Gurmeet Sir for making this possible.
Bhavana, Tarun's Mother

Shoutout to our Partners

Thank You for Showing Up We extend our deepest appreciation to the partners who support us with the most valuable currency of all—their time and presence. Whether you are cheering on the field, sharing your expertise, or simply walking alongside us as friends and mentors, your impact is immeasurable. You remind us that true inclusion isn't bought; it is built through shared moments, genuine connections, and the willingness to show up..

Thank you for walking this path with us and turning the dream of inclusion into a daily reality!
